### Massage Therapy

*Without darkness there is no light...  
without stillness there is no movement.*

The benefits of massage create the foundation of a healing lifestyle. Improved circulation, relieved congestion, relaxed muscles, a replenished and fresh supply of blood and oxygen to the body, and relief from mental and physical fatigue are just some of the advantages of regular massage.

We strongly encourage weekly massages for improved circulation, muscle tone and your well being.

“Employees who receive a massage weekly are more productive and less depressed than workers who do not.”

- All prices begin at stated prices.
- We suggest waxing every 4-6 weeks.
- For best results, allow your skin to breathe after waxing so the hair follicle can heal. To avoid the possibility of infection, please wait at least twelve hours before applying cosmetics.
- If you are planning a facial, please remember to have your waxing service first. Waxing is more efficient before your skin is softened by the water, steam and heat of the facial.
- Please allow 24 hours before sunbathing or using a tanning bed after waxing. Newly waxed skin is sensitive to the sun and will burn easily.
- Skin is sensitive during pregnancy and menstruation, so bruising or redness may appear, especially in the bikini area.
- We regret that we cannot perform waxing services for clients who are taking Accutane, Retin A or antibiotics due to the skin sensitivity these medications produce.
- If you are planning a vacation to a tropical climate, please schedule your waxing 3-5 days before your scheduled departure. Newly waxed skin opens the hair follicle, leaving the area more susceptible to staphylococcus bacteria.
- Customized waxing available upon request.
